

This cohort of children has been particularly interested in our enormous selection of magnetic tiles. We have had them available in the room most days and it has been wonderful to watch the development of the way in which they are used. Initially all the children lay them flat on the floor, producing 2D creations but now we are seeing some very impressive 3D structures!

Lunch Club is a lovely calm part of the day with plenty of time to chat.

At singing time we used chairs to make a train and then sung "Puffer Train" and "Down at the Station." WE even gave out train tickets....the train transformed into a bus and we sang "Wheels on the Bus!"
